My comments are as follows:

1 | This SDEIS public comment period needs to be extended to accommodate the public that this complete project will effect. The hearings are too limited. They need to be increased to all the areas of the proposed transportation routes. If the transportation routes are not yet approved, this SDEIS comment period should be extended until that process is complete.

The time spent focusing on getting the information to the public is at the minimum level of standards, yet this nuclear waste will last for generations to come and will effect millions of people. I personally have distributed 385 copies of the SDEIS as well as public comment sheets, throughout the Pahrump Valley to various businesses and individuals. The mass majority of these people had no knowledge that this document existed, let alone knows that they had the ability to comment on this SDEIS, whether it be in writing or at one of the three public hearings. The DOE should have paid me for doing their job, at least \$10.00 per copy. Even at that, it is an extremely low figure for informing the public about their right to be involved in this public process. It should made public, the specific amounts showing how much the DOE actually spent, on advertising to make the public aware of the SDEIS and it's minimal public hearings on this supplemental document.

- 2 The DOE does not have title to Yucca Mountain. It is on Western Shoshone Nation. Currently the DOE is trespassing upon Newe Sogobia and committing violent acts against the Sacredness of Yucca Mountain as well as disregarding the Treaty of Ruby Valley signed in 1863 by the U.S. Government.
- 3 The comment period did not take into consideration peoples of learning dysfunctions. The DOE should make accommodations for these peoples. Holding publicized meetings to verbally distribute written information. This would be done by an unbiased outside source, not of DOE employment.
